

Our first 5 years

In our first five years, NineSquared has worked with our clients and delivery partners to apply rigorous, evidence based analysis to projects ranging from gym upgrades for PCYC to city shaping projects like Next Generation Ticketing and Cross River Rail and the evaluation of the trans Kalahari railway in Botswana.

We are very proud to have played a small part in each one of our 150+ projects we have undertaken over the past 5 years and are excited for the next stage of NineSquared growth which includes opening a permanent presence in Sydney.

We are equally as proud of some of our non-client work as well.

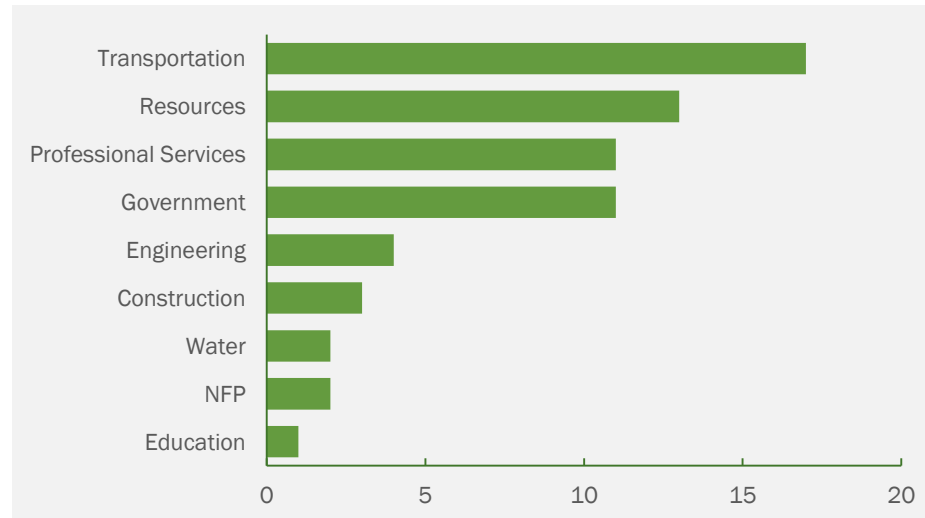

- Included in the BRW Fast Starters List as one of Australia's fastest growing new companies in 2016
- Published the annual Fare Benchmarking Report each year since 2015
- Worked with the Economic Society of Australia to facilitate discussion between academic, consulting and the public sector on cost-benefit analysis
- Presented at the Australasian Transport Research Forum on connected and autonomous vehicles and the potential impact of funding from different taxation sources on Cost-Benefit Analysis outcomes
- Worked with the Right Direction Australia on a pro-bono basis to help them estimate the costs and benefits of their work with youth in detention centres
- Joined the Pledge 1% Movement to give back to the community

And finally...

- Correctly predicted 90% of the 2015 rugby world cup pool games
